EXPERIENCE

Pension Partner, Remote — Tech Lead

June 2022 - March 2023

Led a team of 4 developers to deliver a web-based version of an established suite of pension calculation and modelling tools, successfully onboarding multiple customers post-launch.

Designed the underlying architecture to support customer-specific functionality on top of a shared core, enabling tailored deployments for each client without forking the codebase.

Novicell, Remote — Software Developer

Feb 2021 - June 2022

Returned to Novicell to contribute across three projects: ongoing development on the cooling products quoting system, a logistics platform for a Danish bus operator to help manage fleet positioning, and a tracking system for automotive parts.

Elliot For Water, Remote — Software Developer (Tech lead)

May 2020 - Feb 2021

Led a cross-functional team of developers and designers to deliver a search engine platform built on Azure (DevOps, App Services, SQL Databases), C#, .NET Core, MVC, Razor, and React.

Novicell, Remote — Software Developer (Tech lead)

May 2019 - May 2020

Worked as part of a development team to deliver a quoting and configuration application for Advansor's CO2-based industrial refrigeration and heat pump systems, used to specify and price installations for major European food retailers including Aldi and Carrefour.

Kustodian, Remote — Software Developer

May 2018 - May 2019

Developed software for fertility clinics to track individual vials stored in liquid nitrogen Dewars, supporting clinical workflows where chain-of-custody had to be infallible.

SKILLS

C#, ASP.NET, .NET Core, MVC
Web API, Entity Framework,
IoC, SQL Server, OAuth.

JavaScript, React, Vue.js,
AngularJS, D3.js, Ionic,
Cordova, Service Workers.

HTML5, CSS, Bootstrap,
Webpack

MSTest, NUnit, XUnit, Jest,
Jasmine, Enzyme

TeamCity, Octopus Deploy,
Powershell, IIS, Azure

GIT, Bitbucket, Subversion,
TFS

Agile, Kanban, Jira, Sprints,
Scrum, CI/CD

Aspen Grove Solutions, Ireland/Remote — *Team Lead*

November 2008 - April 2018

Led a team of developers in an agile environment to deliver a cross-platform mobile app for Wells Fargo, which passed the security acceptance review on first submission.

Designed, built, and delivered a scalable Continuous Integration and Delivery pipeline that automatically deployed and tested hundreds of production services.

Took over an underperforming cross-functional team and turned it around to consistently deliver within estimates.

Contractor, London/Spain/Remote — *Software Developer*

1990 - October 2008

T-Mobile, BT, Williams Lea, Live Nation, Serco, E-map, Scoot, UltraIT, Uxbridge College, Data Liberation, Hatfield University, EPCoT Systems, Travelscene UK.

Working on various contracts mostly in and around London. The highlights were:

- 4 years with BT helping to deliver their phone book across the UK.
- Designed and delivered the internal T-Mobile news website and their online health and safety questionnaire.
- Helped to deliver the content management and front end of the FHM website at E-map.
- Saw and survived the dot-com boom and bust.

EDUCATION

Chipping Norton Comprehensive School, Oxon — 10 GCSE's

1977 - 1988

AT WORK

Having worked remotely for over 20 years I am keen on communication and collaboration understanding that relationships are an essential part of building teams. I have a passion for anything that helps people deliver quality faster which aside from building great software includes Agile, CI/CD and DevOps techniques.

OUTSIDE WORK

I am happily married with 2 kids who keep me busy in my spare time. Due to these "commitments" I am only allowed out after work on Fridays unless special permission is obtained.
